

THE PROS AND CONS OF GREEN ECONOMY

The main **advantages** of green economy are:

1. supporting the future of the planet;
2. improving the green market;
3. promoting equality and equity in society;
4. saving money and using it for future investments;
5. improving human relationships inside a company.

The main **disadvantages** of green economy are:

1. costs for changing things in the office or business place;
2. costs for technological changes, for example solar panels;
3. certification costs for green business auditing;
4. effort and dedication to comply with many legal requirements.

THE PROS AND CONS OF GLOBALISATION

The main **advantages** of globalisation are:

1. people can share ideas and experiences and cultures;
2. all the people around the world can experience different types of food and products;
3. people are becoming more aware of global problems, such as deforestation and global warming;

4. people are becoming more concerned about sustainable development;
5. multinational companies provide new jobs and skills for local people.

The main **disadvantages** of globalisation are:

1. globalisation can be a threat to the world's cultural diversity;
2. globalisation could destroy local traditions, languages and cultures;
3. there is a higher consumption of material goods;
4. globalisation is responsible for deforestation which is an indirect cause of the greenhouse effect;
5. only a few information agencies control the news all over the world.
